A History Of Linux

Proposed Work

Our proposed project is a history of Linux. We will explore major updates, the impact Linux had on other operating systems, and major bugs. We will present these findings three ways: a written report, a google slide presentation, and a video presentation less than 10 minutes in length.

Timeline

Starting on the 6th we will begin outlining the report. The final draft will be finished on the 10th.

Between the 11th and 13th we will outline and make the slide presentation.

On the 14th we will put together a script for the video and record some practice versions. On the 15th, we will record the final video and edit it.

Division of Labor

Twice a week we will meet as a team via video chat ([Whereby](#)) to work on the project. Each team member will be expected to contribute ideas during these meetings. If work needs to be done outside of the meeting times, we will distribute the work appropriately.

We will meet Tuesday and Thursday from 2:00 - 4:00. If one person can not make it to a meeting, the other two will continue with the meeting as planned. If two of us can not make it to the planned meeting, we will reschedule the meeting.
